intellectualem [illegible] contemplationem et actionem et
sunt respicientes bonum et malum sub ratione justi et injusti
veri et falsi suntque passiones intellectuales sive synderesis
sub his passionibus animae est ipsa vis animae [illegible]

Saturni planetarum tabulas vim habere ferunt quae repraesentant divinam
illam coelestium numerorum rationem a divinae mentis ideis
sub ratione animae mundi coelestibus impressam illamque
suavissimam coelestium radiorum harmoniam secundum effigierum
proportionem intelligentias supermundanas constantium quae aliter
exprimi non possunt quam per notas numerorum et characterum

Nihil enim materiales numeri et figurae possunt in mysteriis
rerum dei nisi repraesentative per formales numeros et figuras
quatenus reguntur et informantur ab intelligentiis et
numerationibus divinis quae uniunt extrema materiae et spiritus
ad voluntatem animae elevatae per magnum affectum operantis
coelestis virtutis constat autem a deo per angelicas et
coelestes constellationes observandas in materia applicata ad
finem quaesitum et hoc profundum medium totius scientiae magicae

Prima tabula Saturno assignata est quadrato ternario

mat, quoque sua ad divinum lumen suscipiendum templum deo ipsi
construit atque praeparat. Et quod supra est, ad summum [illegible]
debet nisi accedunt locum non habet deum, sed spera pura aia gratiorem.
Pythagoras εὐσέβεια δὲ θεοὺς ἀθανάτους πρῶτα νόμῳ ὡς διάκειται

nos a terrena ista vita ad divinam extollant atque erigant,
vocantur et daemones, quasi divini, vel [illegible] aliquando

et doctrinam Plat.
Lege autem divina immutabili ordinati sunt hi tres gradus
est autem haec lex immutabilis dei opificis actio a qua
divina et adulta (?) dimanant et quae semper sic fiunt nullaque facta
mutatione ordinantur. Cui legi superaddunt Pyth. iusiurandum
tamquam rationem quae omnia in eodem statu conservat et divinat
quo mundi opifex cuncta numerantur atque aptantur
quae ut deum nossent creata sunt. Omnino ergo nonnulla quidem
quae semper cum eo adhaerent iusiurandum servant, scilicet superiora,
alia vero quae videntur aliquando sunt deinde adulterant
iusiurandum et excedunt inferiora quae non solum divinae leges
sed divini iurisiurandi ordinem violant. Hoc est
naturale iusiurandum, nunc imago est humanum vel civilis
veritatis in rebus ut decet servata fuerit iusiurandi ab iis qui
ad deum referuntur.

In vitibus quibusdam tantus est locorum amor ut omnem
in iis gloriam suam relinquant nec usquam transeant
totae quod id in Rhaetica allobrogicaque in vino
suo picato sentiunt dicunt domi nobilibus nec
agnoscendae alibi
Sunt et in vino prodigia dictum in Arcadia fieri
quod foecunditatem foeminis importet viris rabiem.
at in Achaia abigi partum vino dicunt atque etiam
si uvam edant gravidae cum differentia in gustatu
non sit. Troezenium vinum qui bibunt negant antea
gignere. Thasios duo vini diversa facere
produnt vinum quo somnum conciliari alterum quo
fugari. Sunt vites libanon thuris odore
quarum diis libabant e diverso aspendiae damnatae
aris. Theophrastus de Arcadia habet abortum facientia
Mirum in folia arborum fructum a nullo animalium attingi
foliorum certe semper [illegible] dulcium
Locorum tanta vis est ut circa Memphim Aegypti
nulli arborum decidant folia ne vitibus quidem

falsa est definitio non decidere hic quarum fuerit
singulare quod enim fortasset in Elephantine intelligere
Decidere ~~tunc~~ tradunt mathematici folia ...
sole scorpionem transeunte sideribus id quod ...
arbor arbore ... non eadem
causa ad unum omnia folliat
Mirum quod ulmo tiliaeque et oleae et populo albae
et salici folia circumaguntur post solstitium

deflorescunt omnia septeni diebus nec celerius quaedam tardius sed nulla florebant bis septenis omnia intra Idus Julij. Et harum serotinae
fructum arborum sola nullum ferunt hoc est ne seminis quidem tamarix scopis tantum nascens populus alnus ulmus atinia alaternus cui folia inter ilicem et oleam. Infelices existimantur damnataeque religione quae neque seruntur neque fructum ferunt
Cremutius auctor est nunquam virere arborem ex qua Phyllis se suspenderit
Cypressus semel amittit semen aut quamdiu maturitatem servat ob id dicta hominibus funebribus sacrataque ... sterilitate ... quando semen habent multasque sterilitatem mederam ...
ac constat
Sunt vero quaedam loci vitio infructuosa sicut in Paro silva caedua quae nihil fert persici arbores in Rhodo florent tantum hoc differentiae et sexu quoque in usu maris non ferre dicunt aliqui hoc permutantes mares esse quae ferant tradunt
Reliqua sub folio pomum ut protegatur excepta fico cui folium maximum umbrosissimumque et ideo supra id pomum. Ceditque folium serius nascitur quam pomum
Bifera sunt quaedamque trifera quae ob id sic vocant quia in iis alia maturescunt alia turgent alia florent
Omnes arbores quo magis sitiunt hoc maturius florent etiam aprica loca ut in Cypro tepida
Plerumque cacuminibus ramorum abscisis deficit ipsa moritur tota vero detruncata durat si se supra quam rami fuere praecisa quod suppleti erunt si vero ramum infra transcisa tota moritur

Le vin & le froment sont les deux plus excellents
esprits de la nature vegetale voire les plus
dignes creatures de toutes choses sans raisonnables
pour estre incorruptibles & d'une profonde
substance a cause de l'esprit de vie dont elles
participent plus qu'aucuns autres corps lequel
esprit est vif & vray a tres propre a conduire
fondans le feu pur devant & la chaleur humide
Car faute d'iceluy dont advient du vin d'esprit
vaisseau dans quelque bussart a demi
vuidé jusques a la 4e partie & non plus
dela a 10. 20. 30. ans pourveu qu'il l'air
ny entre point l'air y tombez c'est chose
imbuvable quant a boire le vin mais introduisant
la dedans une bougie allumée toute vive
tout incontinent les nitreuses flammes si
claires & lumineuses qui se pourroit prendre
dans le ciel aussy a voulu nostre redempteur
enclose soubs ces deux especes plustost que
nulles autres le tres sainct & precieux sacrement
de son corps & son sang. & Callisthenes souloit
dire a Alexandre pour le garder de se trop
dissoluement desbaucher que le vin
estoit le vray sang de la terre dont il abusoit
ainsi

La lyre a ... ... au ... ... ~~au ...~~
a 4 parties aussy que dit Pythagoras
apres avoir ouy les marteaux ... ...
a l'invention de la musique dont

diplasion — La premiere est le diapason ou octave lequel appellent les arithmeticiens diplasion a cause de la proportion de ung a deux

hemiolion — La 2e diapente quinte hemiolion de nombre nombre de sons deux a trois

epitrite — La 3e diatessaron les arithmeticiens epitrite de trois a quatre

epogdoon — La 4e est le ton des arithmet. epogdoon de l'ung [illegible] quatre

Et pour ce que les reigles d'arithmetique ne permettent faire de passer oultre a cause de la bonne ou unite du nombre. Car le nombre de deux est le commencement et premier des aultres nombres il fault pas toutesfois qu'il y ait diminution

Les quinze modes d'accord qui s'appellent harmonie celle qui est de huict a neuf. Car oultre les nombres dessus mentionnez fault de conjonction ny assemblement

Il y a six tons de la musique a scavoir l'ung composé de deux demy tons qui equipollent a ces dictes diatessaron diapente diapason diapason et diatessaron, diapason et diapente, et disdiapason, l'aultrement sesquitierce sesquialtere, double, double sesquitierce, double sesquialtere, et quadruple

Les musiciens modernes traictent de la par la gamme ut, re, mi, fa, sol, la

Les six tons de musique estoient les six intervalles ou espaces dans les six cordes de l'instrument des anciens

d'Hercules fils [illegible] resultent sept accords
sçavoir sept assonances ton, diton,
semiditon, diatessaron, diapente avec le ton
~~[illegible]~~ diapente avec la sixte ou diminution et le diapason
dont il s'ensuit donc qu'il y a sept parties de
la musique ou sept manieres, diasteme
systeme, synthongue, ton, demy ton,
metabole, et melopée
Or les cordes de la lyre ancienne Plutar. au traicté
de la creation de l'ame les dit estre deux hypates
trois netes et une mese & une paramese a quoy
l'on a adjousté pour la g. celle qu'on appelle
proslambanomenos desquelles il attribue a la
terre suivant la doctrine de Platon en son Timée
ou il met trois ordres d'elements dans les
bas [illegible] appellés [illegible]

au ciel qui forment attribuant la corde la
lune [illegible] a mercure [illegible] a venus et la [illegible]
au soleil et des [illegible] par ordre retrogrades
la [illegible] a mars tant a Jupiter hypate a
Saturne et la terre a la quinte essence [illegible],
de quoy dependent beaucoup de belles considerations
et [illegible] et mesme en la nature metallique
ou chasque metal respond a une des planetes
le tout selon les qualités dessus dittes et quand
a la plus haulte terre metallique qui respondroit
a la quinte essence [illegible] ou c'est le [illegible]

[illegible Greek marginal note]

Le soulphre [illegible] inflammable

de tous les sels qui se bruslent

Le commun qui n'est qu'un [illegible] de
[illegible] qui [illegible] symboliques et quant
a la nature du sel armoniac qui se sublime
estant le [illegible] n'est pas pour tant adustible
les [illegible] separateurs [illegible] de ces deux substances
volatilles l'une de la nature d'air et l'autre
d'eau et ne reste plus que les cendres fixes
esquelles est contenu

Le sel commun qui se peult extraire par forme
de lexive ou lessive d'eau chaude des cendres
estant tousjours le sel la de la profondité
de la chose dont il est party ainsy que dit
[illegible] au commencement de [illegible]. Ex omni

La raison est [illegible] qui se [illegible] separant

le sel estant [illegible] il demeurera [illegible] nature [illegible]
despouillé de toute [illegible] volatile qui est [illegible]
les arabes appellent Kali [illegible] sal [illegible]
[illegible] esprit

Si le sel est [illegible] il fault [illegible] parf-

putrefactio est corruptio substantiae [illegible]

consequemment d'estre celles qui du sel estraict

Feu, eau pour le sel. Eau air pour le

Feu terre pour la putrefaction de laquelle se prendent

Le feu des formes tient les mysteres ainsy qu'a

Les philosophes naturels approprient de cestes
sortes la fable des Gorgones a leur subjet
gardans les deux sœurs immortelles Stheno
et Euryale pour leur vif argent qui ne se peuvent
destruire ny corrompre au moins leur ny par le
feu ny par aultre moyen quelconque

Le mercure est donc le corps ou metal imparfait
qui est aise a se fondre et dissoudre donc les sels
lesquels par fixation moyennant le soufre qui
est aussi extrait a dire la liqueur dissolvante les

Le mercure [illegible] sont filles de

Les magiciens attribuoient a chascune des planetes

Le parfum de Venus servant a attraire l'amour
estoit composé de musc ambre gris bois

Mais il y en avoit un universel a toutes les essences

il disoit que le Ciel est le souffre estant l'origi
nalité de nature de feu, et que les parties genitales
du Ciel luy ayant esté tranchées par son propre
filz Saturne sont les semences dont on estime de
souffre lequel estant tombé dans la mer
c'est a dire l'eau fut le sel car la mer n'est
pas autre chose que sel et eau de laquelle
[illegible] Venus [illegible] affranchie
le vitriol qui est le principe et fondement spirituel de
Cuivre et la partie totale substance d'iceluy plus

Le quel a bien mot a mot de l'epistre de l'abbé Tritheme
au president de Bagny

Le vitriol sur apres se levant rencontre dans la
terre avec largent vif de plusieurs sortes assemblees
se prend tout les metaux et substances metalliques
car le soulphre vulgaire n'est pas de soy ~~de~~
immediatement toute sa substance verte pourveu
que le monstre assez de ~~[illegible]~~ [illegible] de autres
philosophes moins de courage de tout qui comme [illegible] ou
nature [illegible] le feu le vitriol estant meslé avec
largent vif, ne produict pas le metal neantmoins
[illegible] est faire une substance metallique
[illegible] dit Raymond Lulle au 2 chap.
de [illegible] avec deux [illegible] substances composee
de ces deux qui est le commencement de tous philosoph.
pour la transmutation aussy que le dit Basile
Valentin [illegible] et au grand Rosaire d'Arnaud
[illegible] comme [illegible] Georges
Riplay angloys [illegible] de soy [illegible]
[illegible] qui [illegible] la [illegible] substance
sulphureuse ou nature de vitriol que largent vif [illegible]
[illegible] potest extrahi a vitriolo naturali [illegible]
[illegible] a suis duobus extremis quae sunt terra
et aqua [illegible] mercurio de l'epistre au
Roy Edouard [illegible] extra nostrum [illegible] sulphur
aliquin [illegible] extrahitur mirabili sua
virtute attractiva non aliter quam a [illegible]
[illegible] et quod nulla alia creatura facere
potest

Les deux substances de terre ou de vitriol [illegible]
meslees ensemble produisent [illegible] qui
a [illegible] aussy [illegible] que soy [illegible] mais
au [illegible] la a la [illegible]

lequel defaut sappelle amour pour la grande amitie
concordance et esgalite de toutes les parties. Nonobstant
quy est dedans et empesche la cause quil est tant
desire de tous

finalement au grand oeuvre lor quy est la derniere
action et effort de nature est dict pour le seul
et le seul corps parfaict dont la semence ou partie
seminale est conservee par Saturne quy est le plomb
lequel Saturne a este appelle ce quy devore quil nest
pas du tout fixe sa femme est [illegible] de soy [illegible]
jusques et tous autres sans laquelle lesprit ou teinture
de lor ne se pourroit jamais communiquer separe
de son corps pour estre puis apres volatille et
exalte de la plus noble nature vegetale ou il
se change de volatile sanguinelle et arroist de
couleur jusques au zenit et cela est le [illegible] qui
tombe du ciel de la mer, dont se forment [illegible] ou
le [illegible] philosophes qui aultrement appellent Zimar
qui signifie arabe lumiere de beaute lequel vainct
tous les aultres metaux. Lor et cest la souveraine
medecine des corps

Le cuivre se reduict en [illegible] generalement des tammis
de cuivre avec de la litharge ou bien avec une certaine
terre mineralle quon appelle calamite car la litharge
seroit trop [illegible] et fondant finallement le tout ensemble
a grande expression de feu
Le plomb se change destain avec le sel armoniac
et des poudres [illegible] de borax salpetre
sel de tartre & semblables
Largent vif est plomb ou estain par la seule [illegible]
de ces deux corps metalliques sans pour cela
y contribuer rien que le fort de leur substance [illegible]

diminuées de rez que le fort de leur quantité
de corps et volume
Nous avons aussy dit que le s[usdi]t se transmuoit
de leurs par le moyen du vitriol &c

Les nayades dont les philosophes [illegible]
resjouissent l'argent vif coulant lequel de
ses sublimations produict une maniere de
[illegible] la sechetesse de laquelle est l'esprit
du vitriol qui le congele et mortifie car il
ny a chose plus chaude que le vitriol qui est
de nature de ses [illegible] fleurs de hyacinthe et
couleur orangée sçavoir l'or [illegible] lequel meslé
avec [illegible] la constitue le principal fondement
de subject de cest art comme le marque fort
bien Haraby mondum Romanum estoit [illegible]
entendant par ce mot de mondum Romanum
le vitriol Romain qu'aultres ont dit atramentum
car le [illegible] l'argent vif qui est
appellé ordinairement servus fugitivus lequel se
[illegible] de quoy le mondum dans le
[illegible] par ainsy que nous
avons dit apres [illegible] Riplay [illegible] il peult
extraire de vitriolo Rom. mixtura cum suo [illegible]
[illegible] solo mercurio, & le Roy est l'or aussy
dit [illegible] au 7 de [illegible] chap. de [illegible]
filij philosophorum corpora sunt septem quorum primum
et optimum est aurum et omnium [illegible] caput et
sic habet [illegible] corporibus sicut sol [illegible] stellis
lumine [illegible] splendoris [illegible] virtutis [illegible]
[illegible] dabit [illegible] [illegible] et [illegible]

Qui seruira en similitude aucun des corps subtilz
comme corps liquide Et bien sera a quoy
se raporte et conformement questa escript dapollon
disant quy a esté transmué des corps celestes
leste a dire les racines de nature vegetalles
car il est alors le commancement de toutes les
grandes mineres et vertus rations tant des
corps metalliques que des humaines

La mère consiste de deux substances l'une sallière
et lautre ~~dou~~ douce La sallière est fixe et lautre
volatille La fixe ne peult riens produire et engendrer
de soy sy elle n'est changée et alterée de sa nature
en une aultre par ce quelle ne sçoit aultrement nourrir
par le feu quy est plus fort que la chaleur naturelle
parquoy il fault que tout ce quy est propre et
subiect a corruption et generation soit volatil cest
a dire souffrant et patissant soubz laction de celle
de la substance dont ses maistres fixes se procedent toutes
sortes de minéraux par une certaine accumulation et
assemblement de parties quy se vont et restraignent
en soy sans quaucun accroissement puis apres y surviennent
de la douce quy est volatille partie subtille et claire
quy demeure en son pour son accroissement et multiplication
partie de la douce vegetable ... impaste pour la
production et maintiendra de toutes sortes de vegetaux
et le reste toutes substances largement et humides

Or la seconde substance de la mer ne peult ~~p~~
estre laquelle douce quy est trop liquide et trop simple
pour riens produire immediatement de soy mais il fault
que ce soit la sallière grasse onctueuse et chaude
de la proprieté des semences et subst. propre a
engendrer

Car le sel est tousiours fondement et sanctuaire de toutte
humidité laquelle est double l'une chaude grasse
et onctueuse, et c'est elle laquelle nourrit de
nature de soulphre ou de salpetre l'aultre est
l'une et froide de nature de mer. et de sel armo-
niac quy continuellement arrouse et rafraischit et les
nourrissent comme la salive de l'animal lesquelles
deux humiditez consistans radicallement au sel pour
de la se conioignent a toutes les composées elementaires
et sont la cause de leur production et maintien
dont les plus homogenes de tous sont les metaux
neantmoins elles ne sont aultre chose que sel armoniac
se perdent tous par leur absolution et dissolution
et liqueur coulante tout ainsy que les sels de alum

Les hypostases [illegible] de [illegible] ou de la mer [illegible]
estant et par tout a la nature de salpetre quy est
premierement le vray aliment et soulphre vive la cause
de toutte combustion et la terre de laquelle estant separée
elle demeure morte et inutile a toute generation que ce soit
et dirons que le sel de la [struck through] sont deux aultres natures
le salpetre neantmoins [illegible] de [illegible] quy est
[illegible] digeré et corrompu dans la terre ou il y a tousiours
de chaud tout ainsy et dirons mesme que dans les gros
tas de fumier tout verdit ou se font les plus parfaictes
digestions et putrefactions sans de chaleur le sang
chaude naturelle et le sang [illegible] quy est le vray
feu digestif tant cachée de tous que le sel de la mer
se convertist en salpetre [illegible] quy [illegible] la part
de l'artifice naturel fault que la terre soit [illegible]
corrompue tout ainsy qu'est la paste pour faire du levain
affin de lever puis apres d'aultres pastes et la garder
a c'est effect [illegible] et comme que l'on [illegible] le plus
ny les rayons du soleil ny [illegible] dessus [illegible]

est une certaine argille tres fine [illegible] de
laquelle [illegible] de sel [illegible] a une [illegible]
[illegible] proportionnement dans les entrailles
de la terre [illegible] longuement de soufre
& de sel [illegible] de largille [illegible] & la [illegible]
[illegible] fort grandes et [illegible] mais aux les
[illegible] de l'eau de vie [illegible]
ou de l'eau de [illegible] ou
semblables elle [illegible] pas [illegible]
profondes, et [illegible] de la naturelle
car nous [illegible] de choses [illegible]
[illegible] la nature mais la surmonte [illegible]
[illegible] naturellement
[illegible] artificiellement [illegible]

§

Le soufre n'a point de [illegible]
faut par le moyen de la [illegible]
[illegible] de la nature [illegible]
[illegible] abondance [illegible] de soufre [illegible] par art [illegible]
[illegible] de l'antimoine ou de [illegible] semblables
[illegible] choses [illegible]
sont les [illegible] les sublimes [illegible]
graisse [illegible] sel alcali sel de tartre
sel armoniac sel alembroth & autres semblables
[illegible] estant aussi [illegible] il n'est plus
malleable [illegible]

§

Le plomb & l'estain estans a part soy [illegible]
[illegible] aussi [illegible]
solide [illegible] l'estain est le plomb
[illegible] l'estain [illegible] le plomb car [illegible]
la [illegible] de l'estain [illegible]
[illegible] qu'il n'y a

au lieu d'estaing, aprez de l'estaing avec l'estaing, s'il est
que les ouvriers voulant rendre le plomb plus dur
ou l'estaing meslent tous les deux ensemble, et
rend la masse plus dure que si elles estoient a part
l'une de l'aultre, pour autant que l'humidité du plomb
et la siccité de l'estaing font une liaison plus ferme
qui est cause de dureté de ce meslange de ces
deux metaux.

Tous les orfebvres advertissent que l'or et
l'argent au moins pour le regard de la soulde
car meslez ensemble, ils se fondent beaucoup plus
tost et plus aisement que separez. C'est pourquoy
on les mesle en la soudure

Soudure d'orfebvre

Lorsque les orfebvres soudent, ils les lient avec du fil d'archal
& mettez dessus de la soudure suivante: deux parties
d'argent & une de leton fondus ensemble, et une
d'icelles d'esgal poids y adjoustez pour toutes
parties de soudure, une partie de borax battu,
soudure d'icelle meslez ensemble le tout et en pastez
avec de la bave de [illegible] dragant, dessus
au feu les mettez, y mettant sus du charbon
ardent, & chauffez continuant le souffler ainsi
tant que la soudure fonde et se colle des parties
qu'on veult assembler, ce qui se recognoistra
a l'œil avec la veue

Pour granuler l'or & l'argent

Si on veult reduire la poudre de les tenir bien menu, les
granulez apres soit fondus les dans le vaisseau, et puis
jettez les doucement dans ung aultre plus grand vaisseau
ou il y ait du charbon rond au fond, et remuez
tant qu'ilz se granulent

Souldure de potier d'estain plombeux il
fault prendre 3 parties d'estain, deux de plomb, & une
deux d'estain de glace [illegible] ensemble
avec de la poix resine

Soudure d'or de deux sortes
dont celle cy est au chalumeau

prends demy [illegible] de verdegris, & une noisette
la grosseur de sel armoniac & autant de borax.
broye le tout ensemble & le destrempe avec ung peu
d'eau [illegible] a guise de bouillie [illegible] cest composit
sur les jointures a l'espesseur d'un parchemin, & estant
dessus ung peu de borax [illegible] du charbon
rond [illegible] en forme de grille sur laquelle
mettras ton ouvrage [illegible]
de charbon car estant allumé [illegible] sorte [illegible]
quelle [illegible] basse qui souffle [illegible]
[illegible] que le charbon ne touche point
[illegible] soudure [illegible]
avec le soufflet [illegible] que la flamme se
rabatte dessus l'ouvrage car si le feu estoit trop
aspre il y auroit danger que l'ouvrage ne se fondist
& tout seroit gasté, & quand tu [illegible] que la [illegible]
[illegible] de l'or [illegible] blanchisse [illegible]
[illegible] arrouse le [illegible] d'ung peu d'eau
avec une brosse [illegible] de l'or
[illegible] assemblage [illegible] aux jointures comme si
le tout avoit esté jetté en fonte [illegible]
[illegible] du borax [illegible] ung peu de
sel tant que [illegible] fondu [illegible]
ouvrage le long [illegible] le borax [illegible]
s'il y a quelque faulte [illegible]
qui respond a la flamme il le fault souder ainsy
p. six carats d'or fin de ducats qui sont vingt 4 grains
on les divise car le carat est de 4 gr. tant de [illegible]
que [illegible] de diamants qui sont la plus [illegible]
[illegible] toutes aultres [illegible] carature [illegible] grains

p. dun 24 grains d'or il y en a 4 g. d'argent soldés
de aultant de cuivre fondu premier. Lors fault mettre a
fondre l'argent & le cuivre les ostant a part et puis la
ligature dont il se soldent a demeurer apres fault
les soudures qu'il font d'argent et de cuivre ou
letoz et pour les rapporter tousjours davantaige
fault estre adverty que toutes les foys que l'on veult
lors il fault jetter dessus du borax ou de l'esmail
noir en poudre car c'est la maniere de faire
ou bassiner que l'or pourroit avoir attiré du cuivre
qui le noircissent autrement et luy ostant au
reste ce qui salit le cuivre. L'or est blanc & l'argent
assavoir de le rougir [illegible] sur la braise

La maniere de faire apres de les mettre en couleur estant
de bois de genievre & du sel commun autant de l'un
que de l'autre et leur 20e partie de sel nitre le
tout reduit en poudre sur le marbre & de cest onguent
composé avec du vinaigre distillé tant qu'il soit en forme
d'onguent de quoy tu enduiras les ouvrages d'or a
l'espoisseur d'ung dos de cousteau avec une brosse et les
mettras sur les charbons ardens estendus tant que
le bois de genievre se brusle & consomme par le moyen
du sel nitre car le sel armoniac seroit en fumée
et pour cest effect avec les molettes tu remueras les
charbons ardents que passeras sur les endroicts
ou la composition demourra trop espaisse affin qu'elle
se brusle au plustost esgalement et qu'elle ne descende
sur l'ouvrage par ce que cela durcit [illegible]
la couleur. Cela faict oste le du feu et laisse le
refroidir & l'ayant [illegible] tout estant froid
tu le nettoiras avec une brosse et le mettras tremper
dans de l'urine de jeunes garsons de 10 a 12 ans

## La souldure d'argent

Elle se faict avec sixt parte d'argent et une de leton si
l'argent dont on besoigne est fin a bon [illegible]
si de bas aloy au lieu de cuivre il fault prendre
du leton fondu dans le creuset pour ce que le quel est
de plus dure fusion que l'argent et fault mettre l'argent
dedans et faire les bien fondre ensemble si quelle fondoit
bien incorporez jetter de lingot et le bien [illegible]
deliement puis y adjouster la 3e p. de borax broyé
bien menu et lors se dust de la gomme de dragant
dissoulte en eau et la destremper les soudures que
voudras souder et mettre ton ouvrage a feu de charbon
souflant avec le souflet a main tant que la soudure
se fonde par le moien du borax [illegible]
plus [illegible] fusion que le cuivre ne que l'argent s'il
y a quelque deffault ou fendasse il y fault mettre
nouvelle soudure
Le plomb et l'estain se soudent de mesme meslez
ensemble. Le cuivre et l'arain se soudent avec la
soudure de plomb ou d'argent de leton et borax

## Du borax ou chrysocolle

Rhases au li. de [illegible] donne une composition
de borax calciné du sel commun ja preparé par
6 fois dissoluz, sel alcali et vin distillé, et les
filtrez et congelez, dissoluz d'aultre part dissemblablement
bien [illegible] de l'alun [illegible] et de la [illegible]
d'aultant que de sel laissez les reposer par 3 jours
et [illegible] avec une [illegible] qui [illegible]
au dessus [illegible] de chaux ou huille et meslez les
[illegible] que vous aurez semblablement meslé de la
[illegible] du sel et gardez que vous ne mellez plus
qu'il ne fault puis [illegible] et congelez les tout
[illegible] au soleil ou a feu lent [illegible]

comme Cristal si vous le dissolvez de rechef quand ce
vinaigre filtrez et coagulez il s'affinera tousjours
davantage vous y pouvez adjouster aussy un peu
de sel alcali extrait de la soude d'alicant de salicor
dont on fait les verres de cristal dissoult premierement
en eau commune filtré et congelé et puis dissoult
en du vinaigre distillé comme le sel commun et
sera la chose meilleure

autre façon de sel fusible

Le meilleur et le plus aisé au lieu de tout fault faire cette
composition pr. une partie de soulphre 2. de salpestre
et 3 de sel commun preparé et ainsy [illegible] de sel
de [illegible] corespondant a la quantité
de ces 3 matieres que vous mettrez sur les
charbons ardens autant qu'il soit bien rouge
et enflambé et alors jetterez dedans lesdites
matieres bien broyées et incorporées ensemble ou le sel
se prendra soudain remuant avec un baston de fer
tant qu'il ne sorte plus de flamme bleue et qui
restera fondu dans le pot et le [illegible] broyé
et le laisser refroidir c'estant remis il est si fusible
que posé sur une lame de fer de l'espaisseur de deux
doigts rougie au feu la penetre a l'instant de
l'autre part tout aussy que feroit de l'huile sur
du papier or fault scavoir que la vertu de fondre
les metaux est de fusible vient de l'humide
aussy que nous avons au lieu de l'ame des metaux

Illa res quae sit fusibilis sunt plus humida quam    dict. 6. cap. [illegible]
alia quae sit non fusibilis ergo fusibilitas non est
aliud nisi accidens humiditatis et illius rei quae sit fusibilis
et au 7. Chap. quando sunt fusibilia sunt humiditatis
majoris frigiditatis caliditatis et siccitatis minoris

[illegible] fortasse de alumine borace medicante omnia ipsa metallica quamvis [illegible] a sua natura [illegible] [illegible] [illegible] confusionem [illegible] [illegible] [illegible] Ita ut [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] alia [illegible] illa omnia metallorum [illegible] [illegible]

Soudure de l'or la meilleure

La vraye soudure de l'or qui affille la ligne est de cinq parties d'or fin de 2 d'argent et autant de cuivre (celle d'argent de bas aloy est cinq parts d'argent et une de cuivre, d'onze deniers (car le fin va jusques a douze) [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] moyen (car le [illegible] [illegible] est [illegible] [illegible] [illegible] deux est a [illegible] [illegible] parts [illegible] d'argent et une de [illegible] de cuivre) La soudure [illegible] de l'argent a onze deniers est de [illegible] d'argent et un de cuivre ou [illegible] mais le cuivre est plus [illegible] [illegible] [illegible] [illegible] plus [illegible] [illegible] celle de cuivre de 7 de [illegible] cuivre et une d'argent mais [illegible] [illegible] [illegible] [illegible] avons dit aux de la soudure de plomb et d'estain [illegible] [illegible] [illegible] [illegible] point aux [illegible] [illegible] plus [illegible] moitie

# Raisons contre le soleil commun & mercure pour l'art

Le soleil commun est p[our]tant reprouvé de tous les ph[ilosop]hes
& prendre l'avoir sans exception car ils disent
tous le soleil & la lune que nous trouvons de
n[ost]re subjet ne sont pas morts co[mm]e les vulgaires
mais ils sont vifs n'ayans point souffert le feu
de fusion qui est leur mort ny le mariage dans
la mine qui tiennent leur corps & leurs esprits
mais pour venir a la raison le soleil commun
comme chacun d'eux n'est poinct valablement dissoudre
ny separer ny se dissoudre autrement il ne seroit
pas chacun de ceux toutes les dissolutions
de soleil qu'on s'imagine ne sont ny vrayes
ny radicales d'autant que la chose dissolute demeure
radicallement & inseparablement avec le dissolvant
aussy sont elles toutes vaines & sophistiques ce qui
paroist par effect par la separation qu'on en
fait joinct aussy que le corps est sy fort
adamant de la [illegible] qu'il est impossible de
le [illegible] et de le reduire comme enfans
capables de recevoir les mouvements & les changements
au gre des philosophes il est trop dur pour
le mollifier il est trop [illegible] pour produire de
[illegible] il est trop fort pour estre abbattu de
[illegible] il est trop incorruptible et trop esgal pour
mourir et souffrir la corruption il est trop vif
pour se [illegible] il est trop [illegible] pour noircir
il a trop [illegible] pour [illegible] a la [illegible] de
[illegible] des philosophes tout aussy tost
qu'il a esté tiré de sa mine il a esté [illegible]
qui [illegible] de la [illegible] de la mine luy

a esté la vie il est comme le pomme quy a esté
cueillie avant saison ou arrachée de larbre qui
lorsqu'il fault plus lorsquil mis a la putrefaction il est
bien au moins contraire du trop quy ne faut plus que
sechée et se diminue entre les mains de ceux
quy le manient [illegible] dont les philosophes
vendent [illegible] quy est mort il [illegible] ne sont
pas capables de faire des miracles et si on veult
pas [illegible] de toutes les belles productions
de [illegible] dont les [illegible] sont de souffre
de cendres et de fumée tous les [illegible] touchant
parle de la dissolution de lor et lunion de
[illegible] bien dissolvant radical [illegible] quils ne
congnoissent pas au vray la solution radicale
ils pensent estre [illegible] dans les
[illegible] dans les [illegible] dans les [illegible] quelque
eau quy est plus corrosive que solutive de quoy ils
sont grandement trompez car lor ou il se dissoult
en quelque partie ou il se dissoult du tout sil
se dissoult en quelque partie il nest pas [illegible]
ce quy est contre la verité car sil est egal il
ny a pas plus de raison que une partie se dissolve
que lautre une partie nest pas plus [illegible] que lautre
nest pas plus [illegible] que [illegible] nest pas plus
[illegible] que sil se dissout du tout il nacquiert
rien de plus ne souffrant point de separation
de [illegible] ni de [illegible] de plus ou ceste
solution consiste en sa nature metallique ou les
souffres [illegible] plus noble si la solution consiste
en sa nature metallique il nacquiert rien de plus
parfait que [illegible] corps dont la

bidet ne peult estre que plusieurs que si elle les pousse
de leur aultre nature, elle s'esloigne de la metallique
par sa corrosion et ne sera ny metal ny
aultre chose, et c'est ce qui cause le plus souvent
a ces bruslures de fumees qui faisans sortir leurs
quintes essences sont plustost quelque partie de leur
dissolvant ~~tout~~ estoient corrosifs ausquels ils donnent
de si beaux noms qui par apres avec les
fondants ne sont capables d'estre reduitts en
metal pareil a celuy qu'ils ont mis a tant
de tortures et de gehenne. Et quand mesmes
ils auroient trouvé l'invention de dissoudre et
separer sa teinture ce que je ne scaurois faire
ils n'y pourroient avoir aulcun prouffict
d'autant qu'elle seule ne seroit que plusieurs et ne
seroit que le poix du corps dont on l'auroit tiré
encore peult on doubter qu'il y eust perdition
car n'estant que des portions des corps attenuées
et comme calcinées et petites parties elles ne pourroient
penetrer dans la racine metallique pour y faire
la proiection et purification, car il n'appartient
qu'aux esprits a penetrer et a cette substance
admirable qui a tant de foys esté esleuée de l'or
qui a monté au ciel tant de foys qui a emporté
ses fideles aux ciel d'en hault pour luy donner ce
de pendant d'estre la gloire du monde. Et le don
de penetration qui n'est rien que le sel armoniac
qui porte la teinture dans le metal comme celuy
faict dans le drap qui est le conciliateur entre
les corps et l'ame qui assemble les parties
differentes et repugnantes et qui faict la paix

entre les contraires il fault donc pour les
raisons abandonnées c'est opinion de [illegible]
de laisser la nature dans son lieu qui le fait
comme [illegible]

ces espritz sont ceux qui sont dans le corps de
la nature qui cognoissent l'ordre de la creation
de tout le monde sans doubte que le createur du
macrocosme ils esbastiront le microcosme le chef
d'oeuvre de l'art les fils bien aymés de la nature &
du ciel mais ne nous avons suffisamment
[illegible] le soleil commun & c'est maintenant
a monstrer que le mercure commun n'est point
de l'intention des philosophes

Il est tout evident parce que le mercure
est une chose incapable de generation estant bastard
de la nature a qui elle a desnié son soulphre
& sa digestion ne pouvant estre reduit n'est point
capable de generation d'autant que l'art ne peult
qu'aider la nature & trouver les [illegible] seminales
qui sont dans les subjectz de sorte que le mercure
estant une eau coulante & froide semblable a une
femme impuissante & sterile qui n'est point
capable de [illegible] la semence ny la lumiere de l'embryon
il est inutile je ne veux point [illegible] quelques
questions [illegible] bien raison [illegible] que toutes les
opinions des philosophes & chymistes substance
qui faict ce ouvrage est moyenne entre la molesse
du mercure commun & la dureté du metal que
[illegible] le mercure qui est une [illegible]

hic il fault donc recourir a une substance qui
tienne de la nature de l'eau & de la [illegible]

et des Chymistes prix du mercure qu'ilz appellent
animé qui est le mercure de mercure des philosophes
des philosophes qui contiennent en eux le soleil et la
lune bien capables d'engendrer plustost que les
hommes qui sont morts languissants malades
meslés corrompus par leur mariage dans la
matiere de la terre.

Quant si l'on demande mon advis sur ces herbes
je diray [illegible] que celuy qui auroit
Chymistes de fondre l'arbre mineral [illegible] aux
[illegible] solaire
et lunaire [illegible] transplantés en bonne terre [illegible]
et abondante exposée aux rayons du soleil et de la
[illegible] à l'abry [illegible] d'aquilon il pourroit
[illegible] avoir des arbres qui porteroient des pommes
d'or en grand quantité

Du Nil & de l'Egypte.

La raison pourquoy le Nil croist tous les ans constamment
saison est fondée sur les grandes & continuelles pluyes
qui se descendent de la haulte Ethiopie sur
le commencement de may et n'est manifeste en
l'Egypte sinon selon la mi juin communement
à la nouvelle lune après le solstice de l'esté
va croissant peu à peu tout le reste du moys
et plus fort durant le moys de juillet jusques à ce
qu'elle soit finalement parvenue à la haulteur
à quoy l'appelle la disposition des lunes, et puis
diminue par le mesme degré qu'elle s'est augmentée
jusques à estre du tout reduite comme auparavant
à son canal accoustumé, ce qui s'accomplist
ordinairement dans le [illegible]

Ceste merveille du nil est fort remarquable pour
ce quelle arrive tousjours sans faillir d'un
an en l'aultre au plus vray de l'este durant les
plus grandes & insupportables chaleurs d'iceluy
& lors que les jours sont grands & bruslans
Pline l'ancien dit que les mesures de ceste creue de
l'eau du nil se prenoient par certaines marques
dont la mediocre & plus commode inondation est
de seize coudees si les eaux viennent a estre plus
basses elles ne peuvent arrouser tout plus grandes
elles demeurent trop a se retourner tellement que
celles cy consomment inutillement le temps propre
pour les semailles a cause que la terre demeure
trop molle & destrempee [illegible] la mesme luy donnant
pas [illegible] d'iceluy estant pas trop
grande au moyen de quoy la famine [illegible]
l'aultre car a douze coudees elle se sent de la
famine a treize il y a encore de la disette les
quatorze apportent resjouissance quinze l'abondance
& seize [illegible] tout plein de de-
lices
Jean Leon en ses histoires africaines dit que en une isle
appellee Mikias [illegible] du Caire il y a [illegible]
[illegible] & fort beau palais joignant lequel y a une
mosquee [illegible] au pied
de laquelle y a un petit [illegible] clos de muraille [illegible]
au milieu d'iceluy tout a descouvert se voit [illegible]
un fosse carre profonde de dix huict coudees
au fond duquel un long [illegible] qui se va rendre
par dessoubs terre [illegible] le bord du nil [illegible]
ce fosse est plante une colonne de pareille haulteur
a [illegible] dix huict coudees [illegible] marques
[illegible] & quand le nil commence a croistre
ce qui advient ordinairement vers le 17e de juin

leau dudit fondant par le conduit dedans la fosse
la ou elle croistra de force de deux doigts haulte
de trois [illegible] haulte de deux coudées la dessus estant
[illegible] a cela [illegible] [illegible] [illegible] [illegible] colomne
pour scavoir combien leur [illegible] [illegible] [illegible]
vous asseure que quand leau croistra jusques a
[illegible] [illegible] [illegible] [illegible] [illegible] comme &c.

Les [illegible] dient [illegible] de la [illegible]
du ciel [illegible] qui nest pas esloigné de ce qui est
de la [illegible] [illegible] aquam ab aqua [illegible]
que les [illegible] ont [illegible] [illegible]
par [illegible] attachés aux [illegible] par le [illegible]
[illegible] la [illegible] [illegible] [illegible] qui est [illegible]
[illegible] [illegible] de [illegible] [illegible] laquelle consiste
[illegible] de [illegible] par la langue la ou a bord
[illegible] [illegible] [illegible] [illegible] [illegible] qui [illegible]
[illegible] [illegible] [illegible], [illegible] a touché
de ce secret [illegible] a soy semblable quod est
inferius est sicut quod est superius ad perpetranda
miracula rei unius [illegible] [illegible], [illegible]
quant il est dict [illegible] [illegible] [illegible] [illegible]
aquam [illegible] [illegible] [illegible] [illegible] [illegible]
[illegible] [illegible] [illegible] sunt aquae quae
[illegible] [illegible] [illegible] [illegible] quae [illegible] [illegible]
arbitr —

au reste toutes les [illegible] [illegible] [illegible] de la nature
ont esté par les [illegible] [illegible] [illegible] [illegible]
compris soubs le faict de [illegible]

Les poetes ont dit que les nymphes estoient nées
de lamour il falloit que le [illegible] fust [illegible] [illegible] aussy
[illegible] [illegible] leau et la [illegible] [illegible] [illegible] qui est
lamour qui [illegible] [illegible] grand [illegible]

5

aussy voila lesprit et leau la chaleur et lhumidité quy
sont les procreateurs de lamour cest a dire
de leur contrarieté se forme la paix union et accord
la naissance generation et la vie car toute vie est de
nature daire chaud et humide sans lequel lhomme ne
pourroit vivre.

Les philosophes chymistes cherchent leur elixir aux propres
de particuliers du petit monde metalliques proportionnez
a ceux du grand tout et les appliquent [illegible]
correspondans les uns aux autres prenant le
[illegible] pour leur soulphre et largent vif pour leur
[illegible] quy arguent la nature daire quand
tous ces elemens sont separez par leurs [illegible]
de [illegible] et ont passé toutes les transmutations
des qualitez l'une a l'aultre mais estant leur [illegible]
aussy quen sont de amour il la fault fixer
de [illegible] sur sa [illegible] aussy que dit Hermes
en sa table [illegible] est sol mater eius luna [illegible]
[illegible] est si [illegible]
[illegible]

Noté quil ny a que lor largent et le [illegible] quy
se [illegible] au faict de monnoye
et de [illegible]

[illegible] jadis de leau de la mer nest aultre
chose que la terre quy vint a paroistre quand par
[illegible] se [illegible]
pour la commodité et nourriture des animaux

Les metaux parfaictz & les vifs ont fort grande
convenance ensemble premierement en ce qu'ilz sont
les dernieres & plus accompliz oeuvres de nature
les metaux de la nature & les vifs de l'artifice
venant de l'action du feu qui est comme opposé
& droicte lumiere a la chaleur naturelle procedant
du soleil lequel estant continuellement occupé
en la production des choses composées des 4 elements
a assemblé & uny les parties conjoinctes &
conformes & separé les heterogenes estrangeres
& corruptibles tend par ce moyen tousjours
a une perfection complette & finale en nature
qui consiste & parvient en l'or sans pouvoir
passer oultre pource que c'est le plus egal
& proportionné, & par consequent le plus parfaict
de tous les corps elementaires qui ne peult
jamais estre corrompu par accident quelconque

∴ §

Que le soleil tend tousjours comme a son dernier
but a faire de l'or il est manifeste en ce
qu'a la derniere resolution de toutes choses laquelle
se faict par le feu il se trouve de l'or car encore
ce que nous voions des cendres de bois herbes linge draps
& aultres semblables choses desquelles sans y
adjouster rien qui ce soit mesmes par sans artifice
se trouve de l'argent par une coupelle oultre celuy
qui peult estre contenu au plomb, & de cest argent
quelque portion d'or au depart & combien qu'en telles
matieres telle quantité on peult aussi apprendre qu'il
y a substances subtiles plus & aultres moins

Comme donc l'or est la plus elabouree substance de la nature le verre aussy est le dernier ouvrage et effect que produise le feu lequel ne cesse jamais de separer et desjoindre les parties des composés elementairiques n'ayant finallement fait du verre et lors il est si fixe que ne pouvant plus estre dissipé ny corrompu et que a [illegible] seulement il le faut cuire tout aussy que le metal

)

au moyen de quoy a bon droit l'or se peult dire le filz du soleil dont aussy il porte le nom et le verre celuy du feu sans qu'il y ait aucune substance de toute la nature qui puisse immuablement resister au feu fors ces deux cy lesquelles consistent toute la vertu de celuy l'une au premier bout ou degré qui est la chaleur du soleil et l'aultre au dernier assavoir le feu la ou au lieu de se diminuer ou corrompre au contraire elles se renforcent affinent et amandent tousjours de plus en plus comme il se void [illegible]

ʃ

le verre au reste est composé de deux substances l'une vegetale qui est [illegible] volatile donnant passage l'aultre minerale corporelle et fixe qui rend les parties [illegible] et [illegible] quelles ne se [illegible] et separent car le reste [illegible] ne demeureroit plus qu'une [illegible] et morte ny comme dit [illegible] verre nulle au plus [illegible] de sont de deux substances la premiere [participant?] de l'eau et de l'air les deux elemens humides et volatils l'aultre du feu et terre les deux elemens secs et fixes ne s'abandonnent jamais l'une l'aultre donc [illegible] unies [illegible]

diuerses aussy demeurent a perpetuité jointes ensemble exemptes de toute corruption et separation quand elles sont parfaitement depurées et les autres qui donne degrés de leur affinement autant de leur commune de lor

aussy les philosophes chymistes ont cherché en leurs escrits ou exemplaires de leur pierre comme dit Raymond Lulle que la poudre des pierres estant vitrum sit tibi [illegible] [illegible] armam [illegible] avant luy de [illegible] de la premiere lumiere quid ergo facit talis aquam philosophorum [illegible] quod [illegible] sit facere vitrum

§

La premiere de substance vitreuse qui est la vitrifiable des volatiles sont deux choses : cailloux, sont ou salicor des arables qui est [illegible] de leur tel fort composition pour la vitrification, comme les quelles sont [illegible] qui sont ou marins de nature [illegible] si [illegible] [illegible] [illegible] [illegible] [illegible] qui est [illegible] pour [illegible] le verre si elle n'estoit [illegible] de sable ou de cailloux toutesfois il y a des [illegible] qui portent leur sable de substance [illegible] qui [illegible] [illegible] de propre [illegible] [illegible] [illegible] de faire le verre a [illegible] aussy il y a des sables qui sont le verre comme [illegible] [illegible] de plus

pour faire [illegible] qui [illegible] composé de [illegible] le verre [illegible] le verre de [illegible] est le plus propre

pour esclarcir et purifier le verre et les cendres
de christallin qu'on appellons de quoi on
faict les glaces de mirouers et les beaux verres
de venise les pierreries contrefaictes et les esmaux
faut d'esliz pour orfebvres sur le metal qu'ils servent
pour appliquer aux ouvrages de terre

Il fault premierement destremper la soude dans de l'eau
chaude et la filtrer par un linge ou par le moins la passer
et ... par esvaporant l'eau la congeler
cette substance, l'on nomme que j'appelle le
sel alcali et le meslez aussi preparé avec le sable
ou caillous preparez qui se preparent ainsi
les preparations faictes [illegible] au
four de la [illegible] alors on jette dedans du minium
ou couleur qu'on appelle c'est du plomb calciné
rouge le laissant au meslinge pour [illegible]
jours par les deux premiers rend le verre jaune
les deux aultres suivants verdastre et de la [illegible]
deschargeant peu a peu jusques a ce qu'il finalle
le devienne clair et transparant comme l'air
le christallin aussi affiné et purgé est le subject
des pierreries contrefaictes et des esmaux

Pour l'esmail donc il le fault assembler avec
une chaux metallique qui est faicte de deux
parties de plomb et une d'estain de cornouailles bien
calcinez ensemble au four de verrerie ou semblable
car l'estain est ce qui donne le corps a l'esmail
c'est a dire qui le faict opaque sans transparence
plus ou moins selon qu'il y en aura et le plomb
joint le metal avec le verre car il est le
mediateur de ces deux substances et faire luy—

lors principallement lorsqu'il y a de l'estaing ou
plomb d'aultre metal ne se pourroient liquefier
il fault donc prendre du cristallin dessus dit
et de ceste chaux laquelle on appelle commune
aultant de l'un que de l'aultre les pouldre tres deliee
et les incorporer ensemble avec un peu d'eau en
forme d'un pain pas fort plat laissant un trou au
milieu pour faire evaporer l'humidité tout a loisir
puis le laisser seicher par deux jours et mettre
au four de verrier tant qu'il semble que se veulle
fondre tire le hors et laisse refroidir et le mettre
apres en poudre et le broyer dans un pot a
verre et faire le fondre ostant la graisse et ordure
qui surnagera au dessus puis laisse le affiner
par 24 heures voila le esmail blanc qui est
propre a faire tout aultre esmaux car il est
susceptible de toutes couleurs et tient lieu de l'estre
forte—

Prenez cinq livres de cest esmail et aultant de
verre cristallin dessus dit broyez les bien tous
deux ensemble et les meslez puis les mettez
en un pot a fondre au four de verrier la couleur
noire se adjouste avec de saphre et de perigot
autrement manganese a discretion aultant de l'un
que de l'aultre environ 3 onces si vous la voulez
avoir plus belle mettez y 2 ou 3 ou deux onces
partie de ce mesme d'estaing bruslé avec du souphre
ce lo fait mais le bel azuré turquin se fait
par le moien de l'argent bruslé avec du soulphre
le violet avec du cuivre bruslé par trois jours
le jaune avec de ce mesme bruslé que bien forge
il ne fault aussy que un seul des ... tirant sur
le jaune donnez luy quelque portion de cuivre bruslé
par trois fois il semblera d'esmeraude transparant
le dessus sera jaune avoir adjousté la chaux dessus dicte

Les perles vertes de la ... se font de
alliement ... de cuivre avec du vinaigre
et puis l'ayant desseché à feu lent la mettre au
four de reverbere par 3 jours
Le bleu le violet et le gris se font avec le saphre
diversement dispensé et administré car toutes ces
couleurs sortent d'un mesme esprit et administrer
Et celle de turquoise aussy ... moyennant
quelque peu de cuivre bruslé
La couleur de lustre des perles s'introduict dans
le cristallin par le moyen du salpetre ou du sel
de tartre lequel faict encore mieux cest effect
que l'aultre
Viennent puis apres les 4 couleurs qui de degré
en degré se rendent fusibles [illegible] au rouge
clair le chef de par aujourd'hui tous aultres
esmaux
Le premier est le jaune pasle qui se faict par le verre
de esmail avec de l'argent qui produict aussy
de l'azur estant bruslé avec du soulphre mais il
n'est pas bien a propos ny assez seur pour persister
en sa rigueur et assiduité du feu
Puis est le jaune doré orangé ou citrin qui vient
de la rouille de fer et mesmement de ~~[illegible]~~
... et aultres plus ... rouge de carmin
... de la marine ou bien de la ... des ...
... par des dissolutions de vinaigre
distillé y adjoustant un peu de sel armoniac
et apres le long laissé le tout a un feu de reverbere
par 3 ou 4 jours car tant plus les couleurs des
esmaux auront ... et ... tant plus aussi
seront elles naifves et ...

Le pourpre incarnat & le rouge sortent tous d'une
mesme racine qui est le rouge aussy bien que
des teintures des escarlattes & cramoisie
Et de mesme que des 4 couleurs des esmailleurs et
[illegible] nous sont representées par les 4
rubis la topase, jacinthe, amethiste & rubis

Pour commencer au rouge de couleur de grenat
il se faut [illegible] du cuivre
calciné & de la limaille de fer fondue de double
a fort espaisseur de fer y adioustant le fer
dessus pour le faire solide, et tant plus il
y aura de fer tant plus il sera incarnat
aussy tant plus de couleur & de cuivre de plomb.
Car il ny fault point d'estain tant plus il sera
obscure & chargé mais ce qu'on appelle rouge
clair qui est si rare maintenant & requiert si
peu de grain il ne se fera point sans or & sans
argent vif sans plomb & le surplus du cuivre car
il ne fault pas que le corps de ce demeure metal
ny qui est aucunement fixe y estant mais solide
se fonde incombustible qui est la teinture
si haulte de couleur qu'elle [illegible] bien plus
hault que nature la peut voir quand il veult faire la
a se faire comme de couleur de rubis tellement
que [illegible] d'argent separé [illegible] couleur
& or jusques a vingt deux carrats de teinture
plus [illegible] ceste teinture n'est point
permanente au feu sy elle n'est auparavant fixée
par artifice & accoustumée peu a peu a l'endurer
tout ainsy que l'on faict de l'argent de glace
& aux aultres [illegible] de metaux que la nature
na encore conduits a leur dernier degré de perfection

Cela se faict par le moyen des esprits et substances volatilles ... aussy veult on de mesmes ... faire a ... le meilleur ... car le ... de toute ... aussi ... il suffiroit comme plus ... a ... soit ... que les ... avec l'or

La meilleure quy a autrefois esté plus cherchée
quelle n'est maintenant se faict ainsi un once
d'argent fin deux onces de cuivre, un [illegible] et
trois de plomb il fault premierement fondre l'argent
et le cuivre ensemble apres de souffler puis y
adjouster le plomb et le remuer avec un charbon
affin que le plomb soit parfaitement et que [illegible]
incorporent [illegible] apres il est besoing d'avoir
un pot de terre grand comme le poing quy ait la bouche
estroite a y mettre la poudre tant soulphre de [illegible]
[illegible] de souffre [illegible] du plus noir [illegible]

les metaux d'estre dedans bien fondus versant tout de-
-dans du pot avec de largille et du crassin par
dessus et remuez le tout avec le manche jusques
a ce quil soit refroidy affin de bien mesler et
incorporer le tout ensemble car quelque dilig-
ence que vous y puissiez faire la matiere ne laissera pas
pour cela d'estre separee en grenailles et ce sera toutes-
fois en masse le plus quil est possible
Rompez le pot et mettez ceste composition a fondre de
nouveau dans un creuset jettant dessus un gros ou
deux de borax et retirez de la fonte aussy jusques
a ce que la rompant le grain dicelle vous plaise
voila ce quon appelle metal qui saffine par
largent universellement et par lor aussy aux autres
metaux non

Quand aux susdits metaux appliques par lor largent
et le cuivre par les autres metaux non par le bien
et par la terre mais maintenant le bronze car
ne peut par autre chose que par lor bien est
vray quil y a bien autre facon de bronze plus
grossiere que par largent et le cuivre
Cela demeure assez que la composition universelle
du bronze car part de lor et de largent vif
qui est amy de lor plus que de tous les autres
metaux lesquels surnagent a largent vif et un
grain dor tant seulement soudain que vous laprochez
de largent vif sera sa cache dedans et se fera
enveloppé tout incontinent dicelluy le bronze clair
donc ne moit que par lor ⊕
Les anciens ne lont pas cognu et fut trouvé
il y a pas long temps fortuitement par un
orfevre qui se delectoit a lalchimie et cherchoit
a faire de lor au lieu duquel il trouva au fond

du [illegible] d'une coppe vitrifiée de couleur de [illegible] fort plaisante a l'oeil

Le rouge, car pour a ceux de difficile dans tous les aultres metaux que quand on les tire du feu il fault que ce soit tout a coup [illegible] avec des soufflets pour le faire refroidir au plustost quil se peult car il a ceste propriete que quand il se fond a ceste derniere foys il devient si jaune que on ne le sçauroit [illegible] dans l'or [illegible] quil se fault aussi bien garder de [illegible] jaune pour ou [illegible] qu'il est fort [illegible] ~~avec mais~~ pour luy faire [illegible] sa naifve rougeur apres quil sera refroidy il le fault remettre au feu [illegible] et le laisser ainsi [illegible] tant que vous le [illegible] que vous le [illegible] et la [illegible] fondant et le refroidir avec le souffler

La maniere d'appliquer les ~~[illegible]~~ esmaux est telle [illegible] en poudre impalpable mais les meilleurs [illegible] seulement [illegible] fort [illegible] puis au bout de 4 [illegible] le tout estant [illegible] et on y [illegible] de l'eau [illegible] apres on [illegible] pour laver l'esmail [illegible] jusques a ce que l'eau [illegible] fort claire [illegible] cest esmail avec [illegible] et appliquant sur l'ouvrage lequel il est bon d'avoir au paravant faict bouillir [illegible] ainsi [illegible] l'ouvrage est [illegible] sur une [illegible] de fer a la bouche du fourneau [illegible] faict fondre l'esmail [illegible] et [illegible] une nouvelle couche [illegible] ainsi jusques a ce que tout soit remply [illegible] le [illegible] du fourneau et donnant le [illegible] le plus fort [illegible] fondre tout [illegible] finalement on polit l'ouvrage avec du tripoly [illegible] [illegible] propre a cela

pour faire sembl. le suivant fais de [illegible] d'huile ou
demy [illegible] ou [illegible] des p. d'eau ~~[illegible]~~
meslangendes faicts aud. des [illegible] de porter
[illegible] d'huile le espace d'un mot (?)

Le Rouge est la plus belle de dessd. couleurs
de toutes les aultres et la plus noble qui soit
[illegible] elles qui representent le feu le plus sub-
tilement qui soit dont elle est [illegible] Car ce
qui est bien fort rouge [illegible] le feu ne scauroit
plus bailler ni changer de couleur aussi que
[illegible] bon de [illegible] et pourtant estre la plus
forte

[illegible] le soulphre de l'or quand il est bien fort
de [illegible] de son argent vif lequel estant blanc de
soy affoiblit d'aultant la tres grande ~~couleur~~
rougeur dudict soulphre et la couleur [illegible] de
couleur citrine car le jaune comme dit [illegible]
n'est aultre chose qu'un moyen de proportion
my partie du rouge & du blanc aussi qu'on void
affoiblir au saffran [illegible] et aultres subst.
rouges qui n'estans que du blanc deviennent
jaunes citrines. Parquoy le vray [illegible] est la
plus [illegible] des [illegible] pour ce qu'il est
parfaict dudict rouge.

Finallement toutes choses rouges sont [illegible]
dans [illegible] qui de soy elles suffisent [illegible]
qui estant blanches ou d'aultres couleurs [illegible]
[illegible] de l'argent vif [illegible]
[illegible] dont on donne des
[illegible] jusques a 6 grains aux [illegible]
et aultres maladies [illegible]

mais comme ung vase de terre quy ne se dict

se faut garder de toute odeur de metal cesta
dire broyer longuement sur le marbre avec la

en consistance semblable au corail et la subtilité
a tel sorte de preparation de [illegible]

5

Il y a quatre principalles couleurs respondantes
aux 4 elemens et plusieurs par apres intermediaires
La couleur Noire signifie putrefaction,
la blanche tant pour la rousseur blanc et conformité
de l'esprit quelles ont l'une a l'autre que pour la
solidité de la blanche representée par la [illegible] par
[illegible]

Car la couleur noire est aussy bien signe de [illegible]
et [illegible] a cause que les couleurs suivent
passer les unes aux autres par le meslange
tousjours de plus chargee et obscure jusques
a ce que finallement elles se viennent terminer
en noirceur et lors elle ne peut plus admettre
autre couleur quy [illegible] et altere dautant
que cest elle quy couvre, arrache, et deschasse
toutes les autres [illegible] au moins superficiellement
ce qui faut pas le dehors

La ou tout au rebours en [illegible]
consubstantielle la noirceur est la premiere
de la on vient a la blancheur par les couleurs
intermediaires comme au jaune et finallement au
rouge quy est la fin

Car dirons qu'l'or soit la plus parfaict du dict
Elixir & degré [illegible] de toute la nature ment-
=mons pour ce que la chaleur du feu commun
est plus forte que celle du soleil & couraige
de l'art beaucoup plus hault que celuy de la
nature l'or qui n'a peu estre mené par le soleil
jusques au dernier degré de [illegible] est [illegible]
[illegible] estant [illegible] a l'art de la [illegible]
de rougir pour communiquer sa teincture a
l'argent ce qu'il ne pourroit faire sans cela -

Mais pour ce que le feu ne peult avoir aulcune
action dessus luy si ce n'est par [illegible] lequel
n'est pas commun a tous aussy ne se peult il
pas rougir si [illegible] il n'est alteré & jetté
hors de sa nature fixe & vient d'abondant avec
les choses [illegible] propres y dure a
l'ause que [illegible] meslé avec le metal [illegible]
choses metalliques

Le noir donc est approprié a la terre & de metaux
au plomb ou Saturne Le blanc a l'eau &
a l'argent vif & l'estain le [illegible] a l'air & a
l'argent lequel [illegible] se [illegible] l'azure
plus beau sans comparaison que tous [illegible]
[illegible] d'azur & d'ailleurs & le rouge
au feu & a l'or

Le bleu est de grande consequence [illegible] il n'est pas
[illegible] substance [illegible]
sub [illegible] des jaunes & de bleu aussy
~~que la [illegible] fait le jaune lequel [illegible]~~
~~[illegible]~~

toutes les herbes et fueilles des arbres quand
elles tendent a dessecher et se flestrir de leur
verdure accoustumée retrogradent et jaunissent
par le quel le blanc qui estoit soulz leur celeste
et pourtant spirituelle qui leur donne vie se
vient a manifester pour de [illegible] la verdeur
plus que le jaune laquelle des couleurs [illegible]
Lequel est au blanc de corps et [illegible]
auquel il signifient d'arrester tout ainsy que
faict la forme de sa matiere &c

Or au dans le soulphre qui est leur teincture
de la substance de l'argent vif leur est [illegible]
hermes et aultres philosophes chymiques
ont appellé de leur chiffres et secretz langages
Le sel et la terre

Le sel commun dont nous usons soit qu'il vienne
de la terre soit que le sel de l'eau de la mer
est mortel ennemy de nature et fait mourir les
animaux de la terre et de l'air et les vegetaux
aussy les animaux qui beuvent de leau sallée et les
plantes lesquelles on arrousant aussy fait on semer
du sel sur les maisons quoy faut raser affin
que la terre ne porte plus

mais quand Jesus Christ dit a ses disciples
vous estes sel terre il entend d'un aultre sel
qui est le sel radical de la terre par le moyen
duquel toutes choses sont produictes minerales
vegetales et animales ainsy que les disciples
a son commandement ont arrousé la doctrine de
nostre foy qui tel sel produisit les [illegible]
fidelles [illegible] de saincte foy

Jeudy de la plus noble terre que vous pourrez avoir
propre a porter fruict et par les lavements d'eau
separez les cailloux et aultres choses estranges
quy y pourroient estre tant qu'elle soit du tout
bien nettoyée la prenez apres de quelque vaisseau
au soleil par les moys vous y trouverez des
petits cailloux pierres qui est le premier mineral
que que ce soit le vegetal et des vegetaux
l'animal separez de ce sel radical
quy est de nature de salpetre adustible et inf-
lammable elle ne produira rien du tout non plus
que le sable quy est premier et sel tout aussy
que le bois omnia dum primatu propria
humiditate et ... nullam nisi vitrificationem
praestat ...

Mais pour monstrer que le sel de terre qui nourrit
et produict toutes choses doit estre inflammable
la vie de toutes choses n'estant que du feu il
fault aussy que ce quy maintient ce feu soit
subtil et passible soubz separation ce quy n'est
pas au sel commun quy ne nous est donné
sinon pour les condiments pour deffendre la
corruption

Jesus & les aultres anciens sages nont pas
ygnore les salpetres ne les aultres dicts selz non plus
car de la cognoissance d'iceux les trois substances
entierement la notice & cognoissance de toute la nature
Et mesme de l'homme forme a l'image du grand
monde car le sel commun (soit qu'il soit ou
de la mer ou de la terre) lequel est subject aux tres
tous selz estant de nature terrestre ... le corps
Les salpetres inflammables les espritz habitans
principallement dans le sang lesquelz vivifient
le corps & luy donnent mouvement & le sel
armoniac qui n'est visible que ... y
est volatil comme tous divins incomprehensibles
& insupportables lesquelles vivifient l'esprit tout ainsi
que luy faict le corps Ces trois selz aultres
plus symbolisent aux trois substances de sel
soulphre & mercure Car le vitriol qui est la 4e
est la semence de tous selz & tout ainsi que ce
monde commenca par ce sel de forme humide voulant
car tout estoit verde quand le grand ouvrier
mit la main a la separation des substances
essentielles aussy finira il en forme seiche ...

l'esprit du vin ne sexhale pas de moy. ne subtilité

Empedocles mettoit 4 elemens quil appelloit du
nom des dieux et deux principes ou facultés
accord et discord dont l'un unit et assemble
laultre desjoint et separe, |||| la chaleur
du soleil unit et joinct et celle du feu separe
et a la verité de ces contrarietés et repugnances
sengendre le mouvement de nature qui est la cause
de toutes generations aussy dit ovid.
quippe ubi temperiem sumpsere humorque calorque
concipiunt et ab his oriuntur cuncta duobus
cumque sit ignis aquae pugnax vapor humidus omnes
res creat, et discors concordia foetibus apta est

Le feu donc & l'eau comme les deux principaux
elemens et les plus contraires sont causes de
toute generation car se faisant sensibles leurs
l'un contre l'autre de ceste sorte consistentes
a se joindre par moyen humide participant de l'autre
des deux elemens qui ayment une sorte de
amour entre deux qualites contraires que la nature
ne peult jamais demeurer oysive et sans rien faire

Aux choses metalliques le soulphre & l'argent vif tiennent
le lieu (pour le regard des especes composant
le metal) de feu & d'eau, et des six especes de
ces 4. consistent tous les metaux le salpetre
et le vitriol ou alun qui sont pour l'air & la
terre

Ne pensant aussi au reste Pindare a commencer toutes
ses poesies par ces 4. premiers vers

ἄριστον μὲν ὕδωρ, ὁ δὲ
χρυσὸς, αἰθόμενον πῦρ,
ἅτε, διαπρέπει νυκτὶ,
μεγάνορος ἔξοχα πλούτου

Car il a mis l'eau toute la premiere comme la
base & fondement de toute generation et de
l'autre costé le feu comme opposite l'un a l'autre
lors cependant entre les deux ce qui n'est pas
sans mystere car c'est le plus pur le plus
digne & accomply de tous les corps elementaires
que ny l'antiquité ... la rouille de l'air ny de
l'eau ny toutes les salsitures corrosifs au dedans
de la terre ne peuvent de rien endommager

Les hebreux oultre plus ont deux especes de Cabale
ou science traditive de main en main l'une qui est des
choses spirituelles et celestes quils appellent de Mercava
comme est ce que traicte Ezechiel au 1er chap.
l'aultre de Bresith, de la creation ou des
choses naturelles a propos de quoy les anciens ont
estimé qu'il y avoit des nombres es [illegible] et
animaux qui pouvoient beaucoup servir aux predict.
comme prenant les os ou le [illegible] de [illegible] ou plante
animal appellé des hebreux Jedua et le mettant

les dites [illegible] et predisoient les choses futures
Or le qui part des animaux et des bestiaux
se rapporte a la lune et qui procede des animaux
se refere a la sphere de mercure sur quoy aussi
Venus dont dependent les parfums odeurs et

contemplation comme dans soy plus [illegible] et [illegible]

selon la maxime d'aristote que les melancholiques

La Neufiesme qui est le 1er mobile garnye de
nombre de figures et semblables choses plus
formelles que materielles qui pour les orrasions
sapprochent plus de la nature des nombres et de
substances separées
La 10e est le ciel empyrée ou le firmament qu'on
sattribue a apollon qui est lame du monde que
les cabalistes appellent meditation et Varhassamin
le pouvoir de faire ou operer de dieu la est le throsne
de grand dieu devant lequel son chariot est Merkava
Cherubins chantants par le prophete Ezechiel dont
procede la revelation prophetique qui est un don
don de grace special du createur moyennant

lillumination divine et ne se peult acquerir par aulcune
estude speculative ny aulcune bonne disposition et
aptitude de nature qui sont de elles si elle ne luy
provient expressement de dieu par illumination ou en
veillant ou en dormant.

Les sages hebreux font trois principalles branches de
la prophetie astronomie les songes les visions et
les revelations qui se voulent apres le repos
du corps
Des songes il y en a de faux et de veritables
des faux les uns sont de toute sorte de visions qui
ne veulent rien signifier comme les songes dautonne quand
les fueilles des arbres tombent desquels a
a dit somnia ... et de lautomne ... 
... estoit faicte vraye ne demeure point ny ... 
les songes
Les aultres faux sont ... ou ... mais ne
sont a fait illusoires comme les songes dagamemno —

des Cabalistes et y en a de plus expertz et de plus
nettz que les aultres qui nont pas besoing dinterpretation
ainsy quon lit de Salomon auquel dieu sapparut en un
songe luy disant demande ce que tu desire affin
que je le te donne — Il y en a quy ont besoing
dinterpretation comme ceux de Pharaon et les histoires de
Joseph filz de ~~Josep~~ Jacob et ceux que Daniel interpreta
aux officiers de Pharaon
Les cabalistes attribuent la faculte de ces interpretation
de songes a lange Gabriel quy preside a la lune
dont il dit quelz nous sont envoiez a cause de la ...
Ce quy se faict par la communication de lesprit imag
inatif et de lintellect bien disposes ou par illustration
de lintellect agent que les Hebrieux appellent Ischamaim
quy nous bien illumine lame ou nous ...
par revelation de quelque divinite nostre pensee
estant bien sereine et nettoyee de toutes distractions
sensuelles
Le Rabby Johanan au Talmud dans le livre de Sanhedrin
les distingue en 4 especes et dit que laccomplissement
et effect de ce quelle presagent ne se tarde point
oultre 22 ans — La 1re espece est le songe
matutinal dit Cardinal au 12 de nombre
La 2e espece est quand on songe ce quy touche et appartient
a des aultres La 3e est celle dont linterpretation
se faict par une vision comme au ... de Daniel la 4e
quand le songe se redouble ainsy qua Pharaon les espics
de bledz et les vaches ...
La vision est plus reelle que le songe les unes sont
plus claires et plus fortes les aultres plus obscures
et plus ... les claires est celle dabraham ...
et la vision des obscures les visions de Zacharie
de st Jean en lapocalypse

Les cabalistes appellent une vision bath kol la fille
de la voix nostradame la voix faicte au limbe sans
laquelle l'intellect [illegible] ne pourroit voir les choses obscures
dans le miroir [illegible] ne luisant aultre [illegible] malkut

[illegible] dit ou soleil de justice qui est la hault
dans l'Ensoph ou infinitude de l'esprit [illegible] les
intelligences [illegible] de la matiere les cabalistes appellent
cette espece de vision [illegible] alariot les [illegible]
augustin la intellectuelle
Les [illegible] sont aussy de [illegible] especes l'une de
voix [illegible] et articulee [illegible] saint bonaventure [illegible] au 4e

Lucretij Epicurei Poetæ
De rerum naturâ sensa

De Rerum principijs sic ait

Rerum primordia pandam — Definitio primordiorum accurata
unde omnes natura creet res auctet alatq;
quoue eadem rursum natura perempta resoluat
quæ nos materiem et genitalia corpora Rebus
Reddunda in ratione vocare & semina rerum
appellare suemus et hæc eadem usurpare
Corpora prima quod ex illis sunt omnia primis

Incuria Deorum

Omnis enim diuum per se natura necesse est
Immortali æuo summa cum pace fruatur.
semota ab nostris rebus, seiunctaq; longe
nam priuata dolore omni priuata periclis
Ipsa suis pollens opibus nihil Indiga nri
nec bene promeritis Capitur nec tangitur ira

esse rerum principia

Primo ita statuit
Nullam rem e nihilo fieri diuinitus unquam.
nam si de nihilo fierent ex omnibus rebus —
omne genus nasci posset nil semine egeret
at hæc re nequeunt ex omnibus omnia gigni
quod certis in rebus inest secreta facultas

Item subito exorirentur
Incerto spatio atq; alienis partibus anni
quapropter ubi nulla forent primordia quæ genitali
Concilio possent arceri tempore Iniquo

[illegible]

denique cur homines tantos natura parare
non potuit, pedibus qui pontum per vada possent
transire et magnos manibus divellere montes
multaque vivendo vitalia vincere saecla,
si non materies quia rebus reddita certa est
gignundis?

De principiis fieri resolu- ¶
tionem

Huc accedit uti quicque in sua corpora rursum
dissolvat natura neque ad nihilum interimat res.
nam
Ex oculis res quaeque repente erepta periret;
nulla vi foret usus enim quae partibus eius
discidium parere et nexus exsolvere posset.
praeterea quaecumque
natura sufficiat.
omnia denique debet mortali corpore quae sunt
infinita aetas consumpse anteacta diesque.
denique
= res omnes eadem vis causaque vulgo
conficeret, nisi principiorum dissimilitudo esset, neque
quaedam involumeret et retineret denique saecula
vix obdurat sublegitur ante aeternitas.
haec
alid ex alio reficit natura nec ullam
rem gigni patitur nisi morte adiuta aliena.

Generatio unius est corruptio alterius

¶

Obiectio

Ne qua forte tamen coeptes diffidere dictis,
quod nequeunt oculis rerum primordia cerni —
sunt denique demum corpora caeca —
quandoquidem facti sunt ac mobiles simulacra ignae
amnibus fluminibus adeo corpora quae sunt

Solutio

Tum porro varios rerum odores sentimus nec tamen calidos nec frigora
videmus: nec videmus quae tamen corporea constant
natura, tangere enim et tangi nisi corpus nulla potest res. 381

quid dictu fundant et quaecumque alio narrissent
quid quoque natura rebus tribuunt jam dicatur
Nulla potest corporum aut rebus tribui
corporibus etiam igitur natura cogit esse

Statuit sua dicta principia sua esse corpora quaedam
Cera atoma et inania [illegible]
asserit Inane.                                                            Inane

§

Nec tamen cogunt undique corpora stipata tenentur
omnia natura nam quoque est in rebus Inane quod
                    cognitum est utile tibi varansque
quod si non esset nulla ratione moveri res possent
namque officium quod corporum extat officere atque
obstare id vero in corpore ad esset                    Probatur
                    quamvis solidae res esse putantur
hinc tamen esse licet raro cum corpore cernas quod
in saxis ac speluncis fluit omnia guttis quod si rebus
distribuat in corpore animantum et rigidi permanat
firmum ad esse hinc factum est quod aliis alia
praestare videmus pondere cum rebus
                                                            Conclusio
§

Omnis ut est igitur per se natura duabus consistit
in rebus nam corpora sunt et inane [illegible]
est quod possit dici ab [illegible] corporum se jungere
esse ab inani quod quasi tertia sit rerum natura reperta
nam quodcumque est aut est tactile et est corpus aut inane vel rebus
corporibus est inane

§

Corpora magis duplicia sunt alia sunt primordia rerum alia
quae concilio constant primordia principia solido corpore

§

Dura etiam et solida sic quoque convenit quia ex raro admistione inanis possunt fieri mollia ut aqua &c. si autem essent mollia unde fierent valida solida sumunt [illegible] [illegible] omni compressione fundamento natura caret

§

Immutabilia sunt alioquin nihil constaret et rerum natura non tantum posset [illegible] [illegible] natura [illegible] [illegible] nomine [illegible] perderetur

§

Quo fiant ex

Ergo sunt inquit corpora quaedam quorum concursus motus ordo positura figurae efficiunt ignem et caetera quod dicit adversus Heraclitum mutatoque ordine mutant naturam neque sunt igni simulata neque ullae praeterea rei quae corpora mittere possit sensibus et nostros adjectu tangere tactus

Lucr. ad beatitud. comparatio —

O miseras hominum mentes o pectora caeca qualibus in tenebris vitae quantisque periclis degitur hoc aevi quodcumque est. Nonne videre est nil aliud naturam sibi latrare nisi ut cum corpore seiunctus dolor absit, mente fruatur iucundo sensu cura semota metuque.

Involvuntur rerum vicissitudine summa ac media
Corporea quia quae decedunt corpora cuique unde abeunt minuunt quo venere augmine donant. Sic rerum summa novatur semper et inter se mortales mutua vivunt augescunt aliae gentes aliae minuuntur inque brevi spatio mutantur saecla animantum et quasi cursores vitai lampada tradunt.

De cognitione symptomatum.

Symptomata omnia ad tria [illegible] referuntur, [illegible] [illegible]

De Revulsione.

Latissime patet revulsio et multis fit modis [illegible] attractio humorum fluentium vel fluxurorum in partes contrarias quare omnis revulsio [illegible] attractio quaelibet [illegible] ad quas attractio fluentium humorum [illegible] ad revellendum humorem fluentem ad partes [illegible] quae attrahunt: sed revulsio [illegible] in contrarium humorum vel fluentium vel fluxurorum [illegible] derivatione quae [illegible] est [illegible] revulsio in contrarium [illegible] derivatio [illegible] revulsio ἀντίσπασις

In revulsione sanguinis multa [illegible] concurrunt aliquando gravitas sanguinis [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] sanguinem [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] sanguinem [illegible]

[illegible] ad explorandum vel qui dicit debere fieri revulsionem ex distantissimis
et distinguendum duplicem. E parte distantem alteram a parte laesa
alteram ab humoribus, et cum influentibus ex opposito laesae parti si
adsit plenitudo revulsio [illegible] semper fieri distantissimis faciunda et si non adsit

semper fit revulsio per [illegible]. [illegible] inflammatio est in brachio humores
[illegible] in vena [illegible] [illegible] est [illegible] [illegible] quod [illegible]

Itaque revulsio fit semper per longinqua non ob prohibitionem sed quia non sunt
